EDUCATION

Oct 2020 **University of California San Diego**

Cognitive Science with a Specialization in Design and Interaction

Computer Science

Jun 2024 GPA: 3.44/4.0 Junior

WORK

Jan 2022 **University of California San Diego**

Instructional Assistant @CSE 15L (Software Tools and Techniques)

Support Professor's lectures, host office hours, host lab sessions leading with around 15 students engaging in CI/CD, Incremental Programming, Debugging Techniques, and etc.

Present

Oct 2020 **NVIDIA**

Game Performance Analyst Intern @Perflab

Support Nvidia GeForce Experience with game performance analysis and optimization

Mar 2021 Build automation tools for benchmarking and game related research

Sep 2018 **Axiom Technology Group**

Frontend SWE Intern

Assist development on webapps (wechat miniapp)

Oct 2020 Instruct K12 programming courses

Sep 2019 **Vigorous Youth Training Camp**

Photography Coach, Assistant Instructor

Lead and instruct teenagers on outdoor activities around the world

Present Take photos and videos during events with professional workflow

PROJECTS

Jul 2022 **Project-Trip, a Real Trip Planning App**

Founder

Currently working on a trip planning app (expected to finish in the next month) because all the trip planning apps online are bad. As a crazy travelling enthusiast, I find all trip planning apps online useless. All of them are doing "Route Planning" instead of trip planning. The project that I am currently working on takes the mindset of Note Based Trip Planning (NBTP). The project includes a design document with Adobe XD, and a multi-page webapp based on React (Redux + TypeScript + Draft.js + MUI).

Present

Dec 2020 **eSport Target Acquisition Enhancement AI**

Developer

Built a webapp voter to collect training data for the AI.

May 2021 The project aims to train a model which recommends optimal in-game settings that raises users' target acquisition speed. The voter frontend uses React (Redux Saga, lodash, Material UI, etc) and the voter backend uses Python (aiohttp along with pydantic and pandas to deal with data validation and transforming data to human readable format).

Mar 2021 **Smart Game Frame Analyzer**

Developer

Built a web app that equips OCR and Feature Matching. This tool aims to assist NVIDIA's game interaction automation pipeline

May 2021 The tool's frontend uses Vue + Vuetify, and its backend uses Python with Flask + OpenCV + tesseract to process the images.

Oct 2018 **Video Game: Self-reliance**

Producer, Lead Programmer

Developed a sex education video game using Unity3D+C#. The game has gained DAU up to 30,000, and a total number of 300,000 users after the initial release. The game is also reported by various media including CGTN (Top Chinese Media).

Present

GREAT STUFF

- Oct 2018 **Eroductate**
Present **Co-Founder**
A student organized sex-education organization which aims to spread sex-education via video games. We have over 7,000 subscribers in total on all of our social media sites. Our video game Self-Reliance has gained great attention in China, receiving reports from various media.
- Sep 2016 **More Club**
Jun 2020 **Co-Founder**
More club is a school club I started with my friends in High School. Our social media account DailyMore, posting funny stories related with the school, has gained over 900 subscribers. In the end, we have managed to create a new More Club oriented eco-system in our high school where the students and teachers are closely related with out products such as GPA calculator, Sodex Food Delivery App, and more.
- Sep 2018 **TEDxSHSID**
Oct 2019 **Co-Organizer**
Organized TEDx event in my high school with an excellent team; mainly in charge of finding technology field speakers and the technical aspects of the event(e.g: lighting management, digital content organization); invited several leaders in the Children Programming Industry.
